

Created by Sarah Borland, Henry Pan, Hui Shi Li

Goal:

To create an app that allows fans of Japanese animation (anime) to keep track of when new episodes are released each season.

Anime Alert

— — —

- Obtains, lists and displays info for the latest anime season
- Allows the user to set up weekly episode reminders in their timezone for any anime - with one button
- Allows the user to compile a list of their favorite anime for easy access and information.

Where do we get the data?

— — —

- Grabs images, summary as well as info webpage
- Used jsoup library to pull the data from each anime's MyAnimeList webpage

- Grabs JSON file containing latest anime season that includes airdates, MAL ID as well as simulcast station
- Used retrofit library to pull Raw and Episode data

We store this information into a database we call CurrentAnime.db. The user also get's their own database called UserAnime.db that stores the info of the anime they selected.
